

## GLOBAL HELICOPTER SERVICE

The mining industry requires reliable logistics services, often in remote and austere environments. We thrive in these challenging conditions to ensure that your operations are well supported, safe and efficient, no matter how remote the location.

A helicopter on standby is an insurance one cannot afford to be without. In a life or death casualty event ensuring immediate access to transportation for a well-equipped medical facility is crucial. Cost effective in securing ongoing mine production by supplying critical parts in vital machine malfunctioned. Flying high-value product from mines sites guarantees safety and vulnerable risks of theft. A helicopter on standby will greatly reduce all these conditions.

Medevac capability operates as a critical role in the mining industry. We provide modern and effective Medevac systems for mining operations worldwide and offer a bespoke simple solution or a full Air Ambulance option to suit any size mining operation. Companies like Rio Tinto, CGG Veritas, BHP Billiton, Bellezone, African Minerals, and few more, have trusted our operation team's professional competence.
