About us

GHS was founded
in early 2014

GHS is an approved EASA
German Air Operator

5 000 m² of modern office
and hangar space for
maintenance and aircraft
storage

We are focused on providing
commercial Helicopter Service
worldwide

We offer reliability,
safety and quality

We provide our customers
top class service

We are committed to provide
an efficient solution in line
with the customers individual
requirements

Experience & capabilities

- Turnkey Helicopter and Fixed Wing Aeromedical services including Medical/Clinical Support
- Experience in worldwide helicopter operations for charter, humanitarian support, oil & gas and mining industry
- Aviation services for governmental institutions
- Aviation services for non-profit organizations
- Passenger, cargo and external load transport services
- NVG tactical services
- Highly qualified and experienced pilots and maintenance engineers
- All services executed to EASA standards
- Competent and reliable partner to provide consultation and custom service solutions
- Utmost efficiency

Nigeria

International Operations

Global Helicopter Service has a longstanding history of providing helicopter services in Europe and Africa, providing passenger, freight and advanced Aeromedical services to a number of international clients in a range of countries.

GHS continues to provide transportation to both the United Nations World Food Program (UNWFP) and the International Committee of the Red Cross (ICRC) providing carriage for their humanitarian aid services, which started in 2015. Helicopter services to the WFP have recently been expanded to include Sudan and Burkina Faso and GHS is in the process of mobilising a Bell 412 and an Airbus H225 to these countries.

We have a significant presence in West Africa. This has evolved through the expansion of our helicopter fleet and the addition of aeroplane services resulting in a noteworthy increase in the intensity of our daily operations thereby reinforcing our prominence as a highly respected aviation service provider and reliable partner.

It is our aim to grow our continued involvement within the respective local community and assist in projects to transfer skills and develop local residents where possible.

GHS is continuing to develop the provision of specialist Aeromedical Evacuation Services having provided services to the German DOD operating from Gao in Mali, with current services operating for the European Defence Agency in Niger and the UN WFP in Maiduguri, Nige-

ria. This advanced medical service is delivered through the deployment of the superior Airbus H225 Super Puma, the robust Bell 412 and the versatile Beechcraft 1900. This service operates on a 24/7 basis and includes on-board intensive care equipment, supported by a wide range of medical patient care equipment and professional in flight treatment provided by a team of highly experienced, doctors and medics.

The GHS team takes great pride in all the services we offer and continues to show excellence in all our missions performed in remote, hostile and challenging environments while ensuring that we meet the highest safety and flying standards.

GHS continues to receive accolades for the Nigerian government and local police service as well as appreciation from the UN WFP and ICRC for services provided.

» We are a
highly motivated
management
team ...

Capabilities

- A range of helicopters that are, VFR /IFR, NVIS equipped, Single and Twin engine and fully compliant for off & onshore operations
- CAT - Approved for Commercial Air Transport
- HESLO – Approved for External Load Mission
- AA - Air Ambulance - Approved for Aeromedical flights and Medical Evacuation
- HHO – Approved for Helicopter Hoist Operation
- Helicopter Fire Fighting Training
- EASA- approved Aircraft Management and Maintenance Services
- EASA - Approved Air Crew Training

... with many years of experience in helicopter aviation«

EASA approved Base Maintenance facility for H225, AS332 and Bell 412 in Kirchanschöring

Aircraft Maintenance Management & Maintenance Services

Operating a helicopter is a highly complex task which requires exceptional technical know-how and hands on industry specific experience, as well as a great understanding of the customer's requirements.

We offer a full Helicopter Management and Maintenance Service package as well as individual services such as aircraft management, maintenance and quality control under EASA regulations. Our team of technicians is trained to OEM and industry standards and provides maintenance services 24 hours a day at our Part-145 (DE:145.0426) maintenance facility.

All maintenance management is controlled by our EASA-approved CAMO in accordance with EASA Part-M regulations and maintenance is performed according to EASA Part-145 standards. Both departments undergo regular quality audits to ensure standards and compliance are maintained at all times.

Compliance monitoring through the GHS Quality Control system ensures that all service intervals are adhered to and maintenance tasks are performed correctly, fulfilling the manufacturer's specification.

- Hazard
- Occurrence

Integrated Management System

GHS integrates safety into all of our business processes thereby embedding it in our culture.

Safety & Quality

The highest quality standard forms the basis for our selection and training of personnel. Our flying personnel and technical crews are selected against stringent evaluation criteria and distinguished by their extensive experience.

Furthermore, continuous training and skills development to the highest standards are performed regularly. By following these principles we can assure our clients a service which is professional and as safe as possible.

All our activities undergo accountable risk assessments complimented by a “Just Culture” that is part of GHS everyday life. This combined with an intuitive reporting system, leads to a complete, well-structured and documented data base of our operational history which forms the basis for a comprehensive and results orientated measurement of Safety Performance.

We actively identify and implement “lessons learned” and in doing so strive to carry out our business with zero accidents, incidents and injuries, which is the ultimate goal and ambition in our Safety Management.

ISO 9001:2015 Quality Management

Only demonstrating excellence in operations is not good enough for us. We also strive to achieve the uppermost levels of transparency, efficiency and quality in all we do. This is achieved via the GHS Quality Management System, which covers our Commercial Helicopter Operations as well as related Maintenance Tasks and Airworthiness Management, certified according to ISO 9001:2015 requirements.

This ensures the utmost efficiency for our clients, streamlines our internal processes in all we do and provides an important benchmark against which we guarantee our commitment to provide the “Best Value for Money” service.

Construction of a Bow Tie diagram involves asking a structured set of questions:

- What is the hazard?
- What happens when hazard control (barrier) is lost?
- What safety event (threat) could release the hazard?
- What are the potential outcomes (consequences)?
- How can we avoid the undesired/hazardous event?
- How can we recover if the event occurs?
- How can the potential outcome likelihood or consequence severity be limited?
- How might controls (barriers) fail?
- How could their effectiveness become undermined?

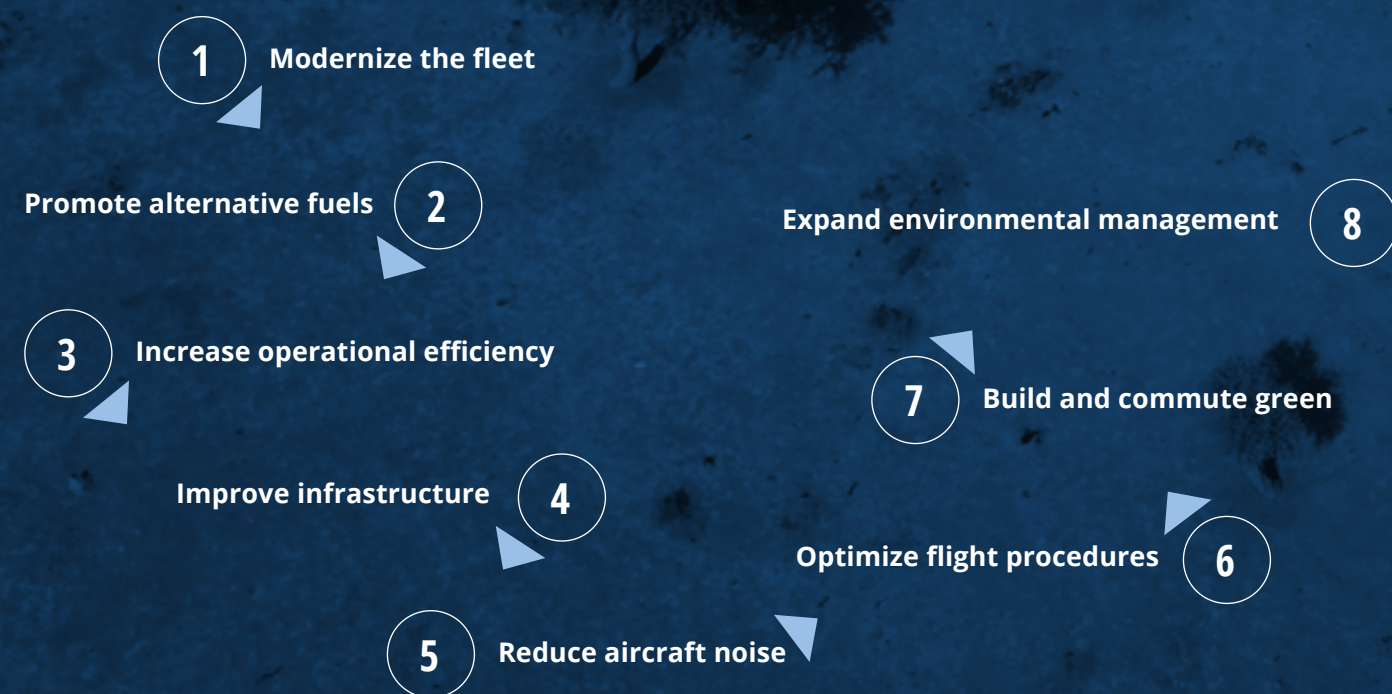

»It is all about our planet«

Environmental Management

Whereas the IATA 2009 agreement solely focused on the reduction of CO₂ emissions as the largest contributor to environmental burden caused by air travel and technology has by far the best prospects for reducing CO₂ emissions of commercial aircraft, there are few developments in helicopter technology that can contribute to the reduction CO₂ emissions.

Therefore, GHS focusses on operations and infrastructure not only to minimize CO₂ emissions but also to aim for a precautionary approach to environmental challenges, to take more environmental responsibility and to adapt environmentally friendly technologies wherever possible:

»The first step of climate action is awareness: it is only once you know what your footprint is that you will be able to take appropriate action to reduce it.«

©UNFCC

Global Helicopter Service manages environmental protection. All our strategies, measures and missions are coordinated with our efforts to protect the environment. Environmental management within Global Helicopter Service will be systematically expanded and further developed at all levels. GHS has made significant progress with the implementation of an Environmental Management System with applicable compliance to ISO 14001.

Certified CO₂ NEUTRAL

Climate change is the biggest threat modern humans have ever faced and highly prioritized by our employees, clients and partners. It is a logical step for us to become a certified CO₂ neutral business and make this a long-term commitment as part of our Corporate Social Responsibility program.

GHS has tracked, documented and calculated its overall CO₂ emissions based on the amount of JetA1 burned by using common formulas for the year 2021. Following this calculation the amount of CO₂ has been offset via climate protection projects certified by the UN.

Thus we neutralized our carbon footprint for our operations in respect of flight hours flown in Africa for 2021 and will again continue to do so in 2022.

Vision, mission, strategy

Our Vision

is to play an influential global role in commercial helicopter aviation within Humanitarian Aid Organizations, Governmental Projects, and the Oil & Gas and Mining Industries. With respect to this goal and our pursuit of excellence and the highest standards of safety and perfection, we are constantly improving services by taking the smallest detail into account and working together with only the most innovative and reputable partners.

Our Mission

is to provide services covering all of our clients' requirements in areas including but not limited to: Passenger Transport Missions, Cargo Transport, internal as well as external including dangerous goods, Aeromedical services including Medical/Clinical Support, Ops Modes: VFR, IFR, NVG, Onshore and Offshore, Professional Aircraft Management, First Class P145 Maintenance Services

Our Strategy

is constantly being reviewed with respect to its effectiveness as a guarantee for our success and for achieving our ambitious goals. Due to the nature of the complex tasks and missions we are involved in as well as the challenging environments we work in, the following strategical key factors are most important to us: Safety Management and Safety Performance Measuring, Financial Performance – Committed to "Best Value for Money" services, Employee's Care and Training, Working Experience of our Management Team, Effective Fleet and Asset Management, Focusing on core Competences and Strong Partners

Safety management & safety performance measuring

- Transparent and effective Safety Management
- Application and implementation of “Lessons Learned” receive the highest priority within GHS
- We carefully select responsible personnel
- We make every effort to continuously provide our staff with training, skills, and the knowledge they need to perform their jobs
- Utilise comprehensive user friendly and transparent state of the art software programs and online tools
- All our activities undergo accountability risk assessments.
- All GHS Staff live our “Just Culture”
- Intuitive reporting system
- Complete, well-structured and documented data base of our operational history
- Comprehensive and result orientated measurement of Safety Performance
- Zero accidents and injuries

Financial performance – commitment to provide best value for money services

- Highest efficiency
- Comprehensive and transparent cost control and project management system
- All our costs are carefully measured, managed and kept under strict control
- Identify inefficiencies and shortcomings before we even start a project

Working experience of our management team

- In depth knowledge and wide-ranging experience
- A close team of individuals with many decades of experience in commercial helicopter aviation all over the world
- Excellent base of different but complementary expertise
- Understanding of latest industry standards, regulatory changes and best practice working processes

Employee's care and training

- Our employees in both the field and office all strive to meet our client's expectations as efficiently as possible while maintaining the highest levels of personal safety
- They all represent the GHS values and apply these to all they do – day by day
- Our employees are the most important assets of our company
- Their well-being is important to us
- GHS makes every effort to provide relevant training measures to ensure that each employee is qualified and capable to perform the designated tasks in the best way possible
- Our employees are encouraged to live our “Just Culture”
- GHS take pride in having an open and trustful working relationship within the entire team

Effective fleet and asset management

- GHS defines and prioritizes the requirements for fixed assets to ensure maximum utilization without compromising on the quality of services
- Effective asset management and control
- Flexibility in responding to our clients' requirements
- Solutions offered provide maximum benefit to the client

Focusing on core competences & reputable partners

- We trust and rely on ethical and reputable partners
- Maintaining transparent, sustainable and influential partnerships
- High quality training, ground handling and consulting services
- Maintaining and developing GHS internal capability, expertise & knowledge
- Flexibility and freedom to focus on our main objective
- To provide helicopter operations to highest levels of safety, quality, efficiency and reliability

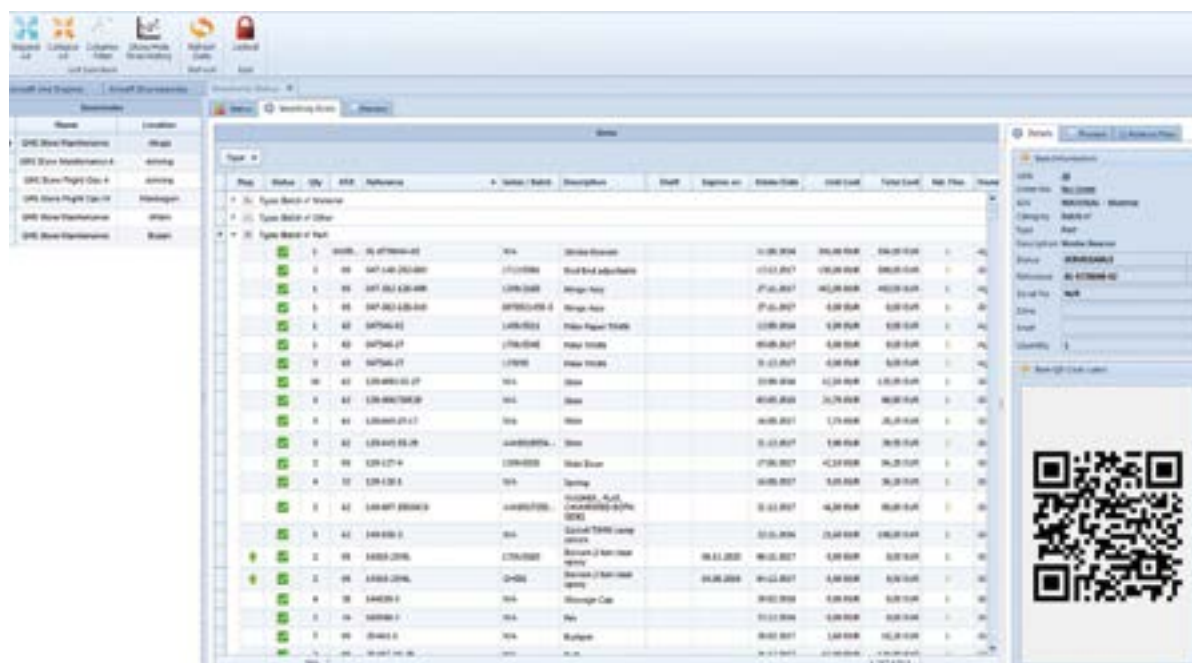

Maiduguri, Nigeria
(oben und unten)

Logistic Management

- Guaranteed large inventory of spares and equipment
- Paperless and effective stores web based system "bluestock"
- Comprehensively trained staff, with years of logistics experience
- Extensive experience in shipping to remote and challenging destinations
- Onsite Consignment stock

– we have the experience«

Advanced Pilot Training

Our training offers focus on advanced training for individual pilots and aviation companies including IFR-courses, twin conversions, MCC course and Bell 212/412 as well as H225 type rating courses.

Our instructors are highly experienced with thousands of hours of a wide variety of helicopter instruction and operational mission flying which qualifies them to provide meaningful skills transfer in conjunction with top-class instruction which blends together for the benefit of the student under instruction.
